MC45 MOBILE COMPUTER

**ENTERPRISE VALUE WITHOUT COMPROMISE FOR FIELD MOBILITY**

**Improve customer service and workforce productivity out in the field with the affordable MC45.** Your field workforce is your daily touchpoint with your customers. Whether they are repairing equipment, writing up sales or picking up and delivering shipments, how well they are enabled to perform their jobs directly impacts your revenue, customer satisfaction, customer retention — and your growth potential. The MC45 is the affordable way to give your workers access to the real-time information needed to get the job done right, right on the spot — preventing lost sales and lost customers. The MC45 gives you the right mix of features and enterprise rugged design in a compact device that fits in your budget. Workers get sleek styling and one-handed operation, along with the features, durability, security and manageability your business demands. So whether your workforce needs to access maintenance history for a repair, reserve product for a specific delivery date to close a sale, reconcile shipments, process returns or capture proof of delivery, they’ll do it faster and more accurately with the MC45. The result? A field team that is more efficient, able to deliver the kind of service that leads to satisfied, loyal customers.

**Class-leading ergonomics**
Motorola’s award-winning Industrial Design team developed a pocketable device that is easy to hold, while key size, key placement and display size make it easy to see and easy to use.

**True field durability**
The MC45 is built for life out in the field, able to handle drops, bumps, spills, dust, vibration and the thermal shock that often occurs as workers travel from a climate controlled vehicle to the outdoors.

**Advanced 1D scanning technology**
Our industry-leading 1D scan engine with Adaptive Scan™ technology makes scan-intensive tasks easy — a broad scanning range allows the easy capture of bar codes from near contact to as far as 15 ft./4.5 m away, even if they are dirty, damaged or poorly printed.

**“Inside-outside” wireless connectivity**
Keep workers connected out on the road and in the office with 3.5G GSM HSDPA cellular and 802.11a/b/g Wi-Fi.

**GPS services in more areas**
Workers can count on dependable GPS access to real-time directions and geostamps that automatically capture information for applications — even in challenging urban areas, dense foliage or inside buildings.

**Expand functionality with our complete accessory family**
Our full family of desktop and vehicle charging cradles, holsters and cables makes it easy for users to manage the MC45 out on the road and in the depot. The MC45 can accept practically any type of payment — including Chip and PIN-based credit and debit cards — through Motorola’s Mobile Payment Module. Bluetooth provides an easy wireless connection to third-party mobile printers, headsets and more.

**Comprehensive camera functionality**
The integrated 3.2 MP color camera allows workers to capture practically any type of data to streamline business processes, including 2D bar codes, as well as photos and videos.

**Best battery power in its class**
With the most battery power in its class, the MC45 delivers plenty of power for a full shift — even in wireless or usage-intensive environments.

**Built-in support for OS-agnostic applications**
Support for Motorola’s RhoMobile Suite enables the deployment of HTML5 based OS-agnostic applications, substantially reducing application development time and costs — a single application can run on mobile devices with different operating systems.
